

## CR-ME4000 Conference System Control Unit

The CR-ME4000 conference system control unit is used for conference unit extension for the standard conference system host. One such device can connect 128 conference units and 32 devices can be cascaded for use. Dedicated 8-core plugs are adopted for connection.

The input voltage is AC 110/220V. Before delivery, all products are subjected to high voltage (3500V) test to make sure that they comply with safety standards. Our conference system control unit is designed with a metal housing which is able to withstand 8000V static.

### Specification:

Model	CR-ME4000
Power supply	110V/220V AC
Static power consumption	10W
Maximum power consumption	350W
Output power	≤110W/24V per channel
Weight	About 6KG
Size (mm)	483Lx278Wx88H
Color	Dark grey
